

The DataEndure Managed Compliance offering provides more than just traditional IT governance, risk, and compliance. Security and risk professionals use DataEndure to **align their compliance programs with top business priorities**, communicate the value of those programs to senior executives, and **manage risks** associated with security and compliance.

How DataEndure helps

Sharing the compliance burden—DataEndure's dedicated compliance specialists help ease the burden of assessment processes by managing your assessment projects for you. We automate our policy development and management to help clients maintain efficiency around compliance.

Evolving regulatory requirements and standards—DataEndure regularly updates and maintains current control-level references to most current and emerging standards.

High-level and actionable risk-based insight—DataEndure customizes a variety of dashboards and views for different business rules to enable clients to quickly receive and understand the information they require to make informed business decisions.

Understand your compliance maturity level—DataEndure can help you understand your compliance maturity level, get visibility into risks associated with your critical assets, and help you protect those assets with the appropriate controls.

Classify assets despite changing business environments—DataEndure can help you get a holistic view of your environment, delivering the valuable information and insight needed to classify assets and drive compliance initiatives for those that are most critical to your business strategy.

Typical challenges

Multiple regulations and industry standards to comply with

Maintaining efficiency around compliance

Complying in a repeatable way

Time-consuming risk management

Key features

Extensive standards library included with the offering that covers current and emerging standards (PCI, HIPAA, ISO, GDPR)

- Access to control-level standards that are used as the backbone for building survey, assessment, and mapping projects within the DataEndure Managed Compliance offering.
- Regular updates to standards as they change and grow over time, reducing the complexity of keeping up to speed as standards evolve.

Assess once and then report on multiple security and regulatory standards

- Industry-specific solutions are available for financial services, healthcare, energy/gas and oil, retail, and others.
- Multi-regulation mapping allows re-use of gathered evidence. Assess for ISO 27001 Certification, and use the gathered results and evidence to determine alignment with HIPAA, PCI, GDPR, etc.
- Custom framework support and custom security standards allow you to support your organization's unique requirements.

Move away from using spreadsheets to manage your audits and compliance initiatives

- Move your compliance data to a centralized platform tuned for reporting on multiple assessment projects in tandem.
- Ease the burden of annual audits and assessments with the use of an integrated and full-service platform tuned to deliver actionable insights into risk potential within your organization across multiple business units.

Full integration of your vulnerability assessment tools and ticketing platforms with DataEndure's solution

- Track asset vulnerabilities through discovery to remediation with trend-based "over time" reporting and point-in-time views of remediation stages.

Benefits we deliver

Tackle multiple requirements and policies at once—DataEndure's Managed Compliance offering enables your organization to tackle the burden of achieving compliance across multiple regulatory requirements, as well as ensure that your business units are adhering to your own internal corporate governance priorities.

Less time assessing, more time addressing gaps—We streamline the assessment process through custom-built automation workflows to reduce time and effort to assess, giving your employees the ability to focus on their core responsibilities.

Seamless integration with existing departments—For organizations that have designated risk and compliance departments, we integrate seamlessly with their teams to make them more efficient and allow them to effectively guide the business strategy through risk management principles.

Find out how DataEndure can help you comply with industry regulations and more by contacting sales@dataendure.com or calling us at **800-969-4268**.

DataEndure helps companies build digital resilience so that their critical information assets are protected and available to the right people, at the right time. We take a holistic approach in architecting and delivering a data management and protection strategy designed to simplify enterprise environments and accomplish specific customer goals.
